

Fully divisible stand (Light Series)

062.8050 Fully divisible stand (Light Series) for flat panels max. 55 inch 30 kg

The SmartMetals light series stands are especially suitable for mounting light weight displays. The solutions are of identical quality as you are used from SmartMetals, but lightweight and especially developed for mounting lighter displays. Due to the stand being divided in 4 parts: the base plate, the column in two parts of 95cm and the stand head, the stand and the screen can be transported compact in a flightcase. Furthermore the screen can be protected from theft by means of a padlock and it can be installed without using any tools. A screen mount with three point coupling bolts should be added, which can be chosen by looking at the weight and mounting pattern of the screen.

Fully divisible stand (Light Series)

Features

Maximum length: 1919 mm

Weight: 26.00 kg
