

Coupling set stack frame

112.1018 EOL | Stackframe - Coupling set (4pcs) for trigger clamps

The SmartMetals stack frames can be mounted in a truss in several ways:

- By means of direct mounting with a fine adjustment system (002.4600 series)
- With two stack frame clamps and trigger clamps (112.1017)
- Or with this accessory set, 4 trigger clamps and scaff pipes.

This gives the rental company freedom to choose which installation method would suits them best. The stack frames are universal, the bracket makes it projector specific. SmartMetals has sets in stock for Panasonic, NEC, Eiki, Optoma, Hitachi, Christie, Barco and Vivitek projector models.

**This product is "End of Life" and will no longer be produced.
It can be supplied as long as stock lasts.**
